

1990 CENSUS TRACT/BNA OUTLINE MAP (RECREATED)

LEGEND

SYMBOL	NAME STYLE
☆☆☆☆☆	INTERNATIONAL
☆☆☆☆☆	AIR
☆☆☆☆☆	Trust Land
◇◇◇◇◇	TJSA / TDSA / ANVSA
▽△▽△△	ANRC
■ ■ ■ ■ ■	MINOR CIVIL DIV¹ / CCD
Place within Subject Entity	Incorporated Place / CDP¹
Place outside of Subject Entity	Incorporated Place / CDP¹
■■■■■	Census Tract / BNA²

ABBREVIATION REFERENCE: AIR = American Indian Reservation; Trust Land = Off-Reservation Trust Land; TJSA = Tribal Jurisdiction Statistical Area; TDSA = Tribal Designated Statistical Area; ANVSA = Alaska Native Village Statistical Area; ANRC = Alaska Native Regional Corporation; CCD = Census Civil Division; CDP = Census Designated Place; BNA = Block Numbering Area.

FEATURES

All Roads	Stream/Shoreline
Railroad	Intermittent Stream
Pave/Paved Line	River
Physical Feature	Oyster
Nontable Boundary	

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.
1 A "-" following a place name indicates that the place is also a false MCD; the false MCD name is not shown.
2 In 1990, the census of ranch population of ships at sea was allocated to census tracts with a "99" suffix. An anchor symbol appeared on the 1990 maps locating a census-of-ships tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the area.

1990 CENSUS TRACT/BNA OUTLINE MAP (RECREATED)
(90RTRT) 19031101002000000000

All legal boundaries and names are as of January 1, 1990 as tabulated for the Public Law 94-171 and Summary Tape File products. The boundaries also reflect the feature network and coordinates as of the Census 2000 geographic base. Since 1990 the Census Bureau updated the base from the North American Datum of 1927 (NAD27) to the datum as of 1983 (NAD83) and made numerous updates to the base features from those depicted in 1990. The boundaries shown on this map are for the Census Bureau's statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights or ownership or entitlement. Source: U.S. Census Bureau's TIGER database (Census 2000). Projection: State-based Albers' Equal Area U.S. DEPARTMENT OF COMMERCE Economics and Statistics Administration U.S. Census Bureau

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

A * following a place name indicates that the place is also a false MCD; the false MCD name is shown in parentheses.

2 In 1990, the crew-of-vessels population of ships at sea was allocated to census tracts with a "999" suffix. An anchor symbol appeared on the 1990 maps locating a crew-of-vessel tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the area.

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A * * * following a place name indicates that the place is also a false MCD; the false MCD name is not shown.
- 2 In 1990, the crews-of-vessels population of ships at sea was allocated to census tracts with a '.99' suffix. An anchor symbol appeared on the 1990 maps locating a crews-of-vessel tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the area.

The diagram illustrates the relationship between a physical feature and its non-visible boundary. It shows a horizontal line representing a physical feature, with a dashed line below it representing the non-visible boundary. The physical feature is labeled "Physical Feature" and the non-visible boundary is labeled "Non-visible Boundary".

Below this, there are three examples of physical features and their corresponding non-visible boundaries:

- All Roads:** A solid line representing a road, with a dashed line below it representing the non-visible boundary.
- Railroad:** A line with cross-ticks representing a railroad, with a dashed line below it representing the non-visible boundary.
- Pipe/Power Line:** A line with small circles representing a pipe or power line, with a dashed line below it representing the non-visible boundary.

On the right side, there are three examples of physical features and their corresponding non-visible boundaries, each with a label above it:

- Stream/Shoreline:** A blue line representing a stream or shoreline, with a dashed line below it representing the non-visible boundary.
- Intermittent Stream:** A blue line with a wavy pattern representing an intermittent stream, with a dashed line below it representing the non-visible boundary.
- River:** A blue line with a wavy pattern representing a river, with a dashed line below it representing the non-visible boundary.
- Glacier:** A blue line with a wavy pattern representing a glacier, with a dashed line below it representing the non-visible boundary.

At the bottom, there are three boxes illustrating the relationship between a physical feature and its non-visible boundary:

- Inset:** A box with a dashed border and the word "Inset" inside, representing a physical feature.
- Out Area:** A box with a dashed border and the words "Out Area" inside, representing the non-visible boundary.

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

¹ A "•" following a place name indicates that the place is also a false MCD; the false MCD name is not shown.

² In 1990, the crews-of-vessels population of ships at sea was allocated to census tracts with a ".99" suffix. An anchor symbol appeared on the 1990 maps locating a crews-of-vessel tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the area.
